

We do not just advise. We **build** the factory with you.

Mahabir.Group sets up door, MDF and furniture factories in Angola, and supplies the raw material that keeps them running. Our own story in Angola began in timber, so this is home ground for us.

We study your project, write the pre-feasibility study your bank needs, walk it through the bank with you, then build or expand the plant. Machines, installation, training, raw material after start-up, and help finding the orders.

HOLLOW AND SOLID DOORS MDF AND PLYWOOD TIMBER DRYING KILNS

SCHOOL FURNITURE COMPLETE FACTORY SETUP

Every study, drawing and
quotation in both languages

What we supply, and how we work

Door factory

Hollow-core and solid doors, frames and jambs. Panel lines, presses, edge banding, sanding and finishing. New line or expansion of the line you already run.

Raw material import

MDF, plywood, particle board, sawn and seasoned timber, veneer, laminates, adhesives, hinges, locks and fittings. Full container and part loads.

Timber drying kilns

Consultancy on sizing and chamber design, supply, installation, commissioning and operator training. Correct drying is what decides whether the door lasts.

Furniture and school furniture

Desks, chairs, cabinets and office furniture. Bulk supply and manufacture for institutional buyers and public tenders in Angola.

HOW A PROJECT RUNS WITH US

- 1 We visit and analyse.** Your site, the machines you already have, the wood you can buy locally, and the market you sell into.
- 2 We write the pre-feasibility study.** A fixed professional fee, paid up front. Deliberately small, and there so both sides are serious. A real document, not a sales brochure.
- 3 We take it to the bank.** We go with you, answer what the credit committee asks, and work it until it is approved.
- 4 We build or expand the factory.** Machines, layout, installation and training, with forward and backward integration so you are not trapped by one supplier or one buyer.
- 5 We help you sell.** Introductions and a working list of buyers in Angola and Congo. We stay in it after commissioning.

Why Mahabir

- 1. Hands-on, not a report.** We have set up and run factories, not only written about them.
- 2. Manufacturer prices.** India and China sourcing, ISO certified supply, no layer of middlemen.
- 3. We know this market.** On the ground in Angola, documents in Portuguese, connections into Congo.
- 4. One party, whole chain.** Study, bank pack, machines, installation, raw material and buyers.
